Trust and Safety Agenda launched 1 February 2023

Pillar 1: Safety in Blockchain

**Security measures against abuse and fraud in
crypto-assets and blockchain**

Pillar 2: Safety with Blockchain

Trust technologies for a safe and reliable digital society

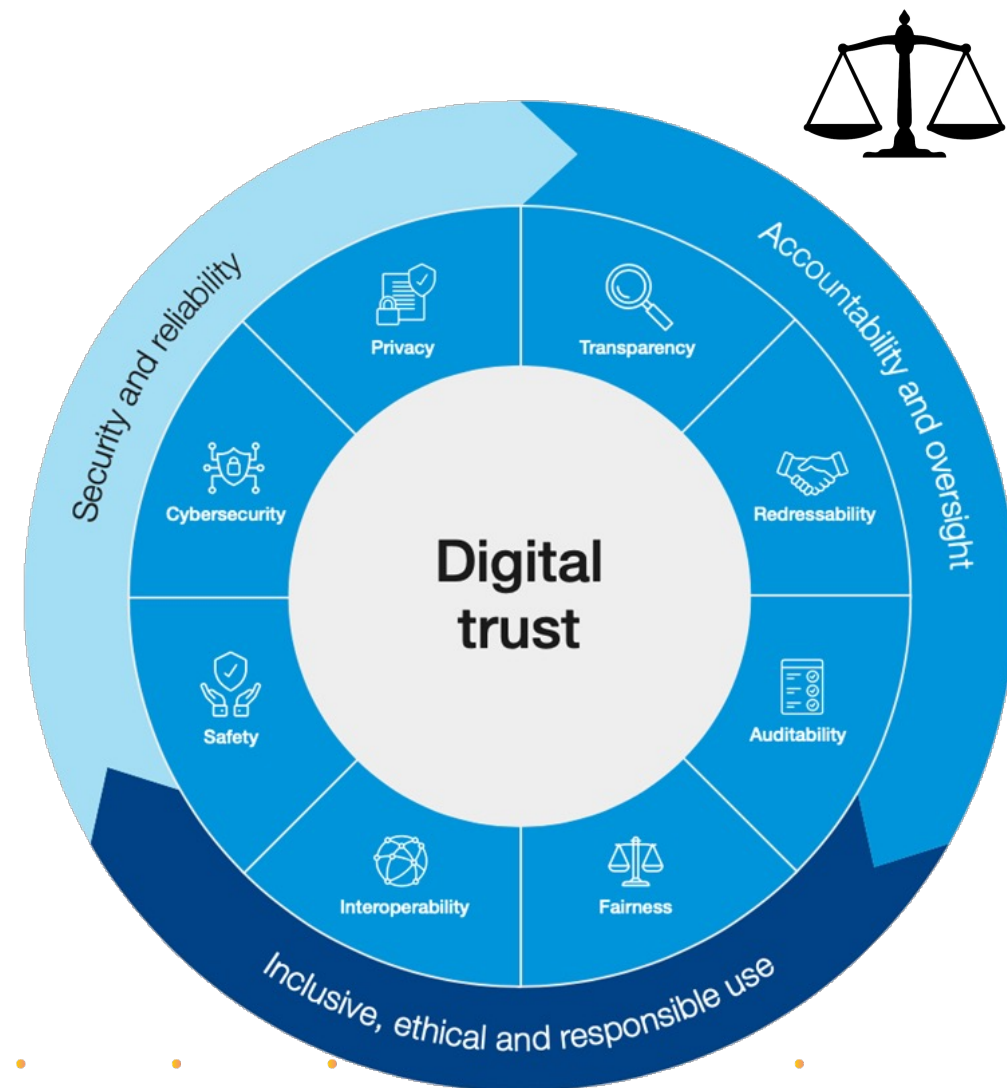

See detailed agenda items

<https://www.dutchblockchaincoalition.org/toepassingsgebieden/veiligheid>

“Digital trust is individuals’ expectation that digital technologies and services – and the organizations providing them – will protect all stakeholders’ interests and uphold societal expectations and values.”

Digital trust is a significant change in the perspective from cybersecurity defense and the perspective of asset owners, to trust in digital services and value-driven digitalization from the perspective of end users and society.

Welke technologie is essentieel bij realisatie Digital Trust?

- 1) Decentrale Technologie
- 2) Artificial Intelligence
- 3) Secure Data Sharing
- 4) Privacy Enhancing Technologie
