Definition of Digital Sovereignty

The ability to walk away from the negotiating table at any time.

Our USP Rests on 4 Pillars

European digital sovereignty

Technology development and infrastructure with a European focus

Customer Zero principle

Technological solutions and testing of these based on the infrastructure and experience of Schwarz Group

Trusted partner

Long-term stability, security and reliability for companies and institutions

Integrated technology ecosystem

Connecting cloud, cybersecurity, data & AI, communication and workspace to form one shared ecosystem

STACKIT x KPN Partnership
